

Godrej & Boyce Mfg. Co. Ltd.

## Godrej Process Equipment ships the first order after acquiring the Yuba ® and Ecolaire ® brands & design technologies

**August 2019:** Within a year of acquiring the Yuba ® and Ecolaire ® brands and design technologies, Godrej Process Equipment has successfully executed the first order for a Steam Surface Condenser for a project in Singapore, contracted through a global technology player.

For Godrej, there are many firsts associated with this order

- First order completed successfully after the brand acquisitions.
- Project scope includes both process and mechanical performance guarantees
- Special metallurgy of Cu-Ni (Copper-Nickel) tubes for the condenser

Allen Antao, EVP and Business Head, Godrej Process Equipment said, *“A hundred years of Godrej Americas Yuba Engineering combines with a hundred years of Godrej & Boyce Manufacturing to give the world the first fruit of it’s joint effort.”*

This equipment had a challenging delivery schedule and logistics which the Godrej team managed successfully and earned laurels from the customer.

With the completion of this order, Godrej has further strengthened its position as a technology and innovation driven company that has been continually contributing towards making the nation.
